

Marine Sewage Treatment Systems

Advanced Safety Electrolyzers (Modular) with SS Cabinet

RT Pure[®] units are built to endure the harsh environment and needs no maintenance for contaminated screens, chemicals and microorganism colonies. RT Pure marine waste (sewage) treatment systems with relay logic control scheme ensures durability and operational longevity in marine offshore applications.

RT Pure Marine Sewage treatment systems provide effective electrolytic treatment of both black and gray water by generating sodium hypochlorite and mixed radicals for marine waste disinfection.

RT Pure meet a wide range of personnel treatment capacities ranging from one to more than five hundred people. RT Pure systems' individual unit capacity ranges from 1780 l/day to 55400 l/day and can combined for increased capacities.

RT PURE design ensures adequate provisions for either retrofit or for new builds and can be configured to suit the available space and piping layout of marine systems.

Benefits

- Economical
- Low Maintenance
- Compact, Lightweight
- No Odor / Sludge
- No Chemical Storage
- Easy Installation, Operation
- Automatic, On demand Operation
- Black & grey Water treatment
- Modular Systems, Skid Mounted
- Replacement, revamp of systems

Application

Offshore Rigs, Oil Platforms, Workboats, Ferries, Merchant Vessels, FPSO, FSO,

Models

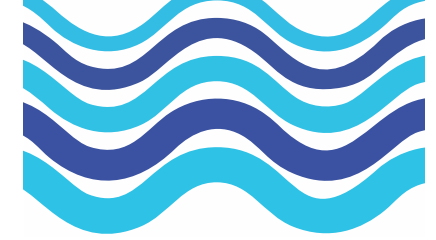

Models	No Of Persons		Treatment Capacity Liters/Day
	Black Water	Black & Grey Water	
RT Pure-15	15	7	1780
RT Pure-25	25	12	2900
RT Pure-50	50	20	5800
RT Pure-75	75	30	8650
RT Pure-100	100	40	11400
RT Pure-150	150	64	17000
RT Pure-200	200	86	22400
RT Pure-250	250	110	27900
RT Pure-400	400	178	44500
RT Pure-500	500	225	55400
